Klein Brands Introduces Breakthrough Humane “Do-It-Yourself” Dog Training Kit

- Affordable dog training kit interrupts and permanently stops dogs' worst behaviors in just minutes – without scaring or hurting them! -

(Hollywood, FL)- Sean Klein, pet-lover and owner of Klein Brands, Inc., is proud to introduce shakeTrainer, the first gentle training kit approved by vets and trainers applying Pavlovian conditioning techniques.

“Our goal is to offer dog owners a humane training method so they can enjoy the companionship of a perfectly well-behaved pet” comments Klein Brands CEO, Sean Klein. “And make no mistake, shakeTrainer is more effective than the old ‘pennies in a can’ technique because it goes beyond interrupting a dog’s unwanted behavior. In fact, shakeTrainer permanently stops a dog's bad habits in just minutes.”

This breakthrough yet easy-to-use portable training device is the most effective, affordable, and humane alternative to harmful training collars and recurring obedience classes.

At a fraction of the cost of dog training lessons, shakeTrainer permanently stops the following behaviors: barking, chasing, chewing, digging, door charging, going potty indoors, jumping up, mounting, play biting, pulling on leash, raiding garbage, running away, and stealing food. These are examples of unwanted behaviors easily stopped by the shakeTrainer method, but it is by no means a complete list.

The secret is shakeTrainer's super-effective *Two-Step Training Method*, clearly demonstrated in the five minute DVD that also includes an interactive guide. Dog owners can simply select the behavior they wish to stop to view personalized instructions. Amazingly, results are immediate.

ShakeTrainer features durable steel construction, a no-scratch rubber bottom, and comes with DVD and User Guide.

It is a well-known fact that a well-behaved dog is more likely to become a happy and active family member. shakeTrainer makes it possible in a fast, easy, and affordable way.
